## Shaft Reworking and Bearing Load Data for Spindle Bearing Units BK, EK and FK (Fixed Side)

### Shaft Reworking:

At **MÄDLER®**, trapezoidal and ballscrew spindles can get reworked, fitting to the bearing units. The spindle reworking in the drawing is just a recommendation. Due to the customer's request, the length  $L_5$  could be shorter or longer and the shaft end could get a keyway DIN 6885.

### Bearing Load Data:

The loading rates and speed limits shown in the table are the limits just for the bearings. The limits of the spindles are much lower, depending on the diameter, length and material.
