

Adjustable Clamping Levers 355, Version N with Internal Thread, Disengaged by Pulling, Plastic

Material: Threaded bush and retaining screw steel, burnished.
Grip body: technopolymer (Polyamide PA), glass fibre reinforced, black-grey RAL 7021. Serrated ring zinc die casting.

User-friendly design. To be used preferably when the clamping range is limited or if a specific clamping position is required. By lifting (pulling) the handle the splines work loose and the clamping lever can be turned to the most suitable clamping position. Letting go causes the handle to re-engage automatically.

Temperature resistant up to +130°C.

Adjustable Clamping Levers 120 Version N with Internal Thread, Disengaged by Pulling

Material: Handle: Zinc die-cast. Threaded bush and locking screw: Steel burnished. Handle: plastic coated, colour black RAL 9005.

Version N = Handle slanted, with metric-threaded bush.

As they are adjustable, they are very versatile in use.

The threaded insert is connected to the lever via the serration and can be released by pulling

Note

This clamping lever has proven ideal wherever the swivel range is limited or where a specific lever position is most convenient for the operator. The lever also features a modern design. By pulling the lever, the serrations are disengaged. Now the handle

can be turned into any direction and the threaded insert can be screwed in or out by turning the locking screw. When the lever is released, the serration re-engages automatically because of the spring tension.

Adjustable Clamping Levers 300, Version N with Internal Thread, Disengaged by Pulling

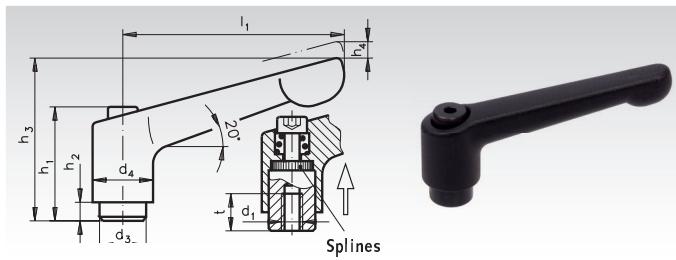

Material: Threaded bush and locking screw: steel 5.8, burnished.

Handle: zinc die-cast.

Plastic coating: black.

Modern industrial design. Easy to operate. Ideal wherever parts have to be clamped in confined spaces or in a particular lever position.

Pulling the lever upwards disengages the serrations, allowing the lever to be turned to the ideal clamping position. When the lever is released, the serrations automatically re-engage.

On request, the adjustable clamping levers 300 can also be supplied with stainless-steel insert 1.4305.

Adjustable Clamping Levers 300.5, Version IS-N with Internal Thread, Disengaged by Pulling, Stainless

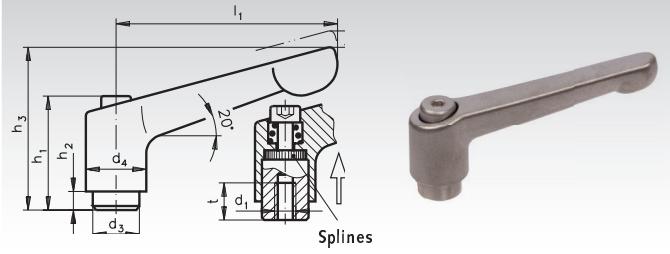

Material: Threaded bush and set screw, stainless steel 1.4305.
Grip body: Stainless steel 1.4308, matt blasted.

Version IS: With internal hexagon screw.

User-friendly design. To be used preferably when the clamping range is limited or if a specific clamping position is required. The thread insert is connected to the handle via splines and can be removed.

By lifting (pulling) the handle the splines work loose and the clamping lever can be turned to the most suitable clamping position. Letting go causes the handle to engage automatically.

Alternatively with outside-hexagon screw on request.

Eccentric clamps 927 with internal thread

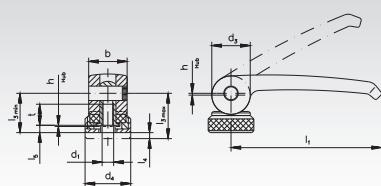

Materials: Lever: Zinc die cast, with wear-resistant epoxy resin coating, black matt.
 Support washer version A:
 Zinc-plated steel, chromated.
 Support washer version B: Thermoplast, glass-fibre reinforced, black matt.

Version A: With knurled adjustable support washer with fine thread. Thus the clamping force and the lever position can be set exactly on the lever side.

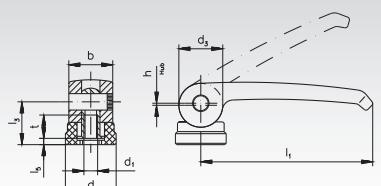

Version B: Non-adjustable support washer. The clamping force, can either be set on the lever side by turning the lever, or on the backside by adjusting the nut/knurled nut if present.

- For rapid clamping and loosening by hand.
- Clamping is made without generating a torque.
- Clamping force is up to 8 kN.

Adjustable Clamping Levers 119 St

Material: Steel burnished.

Version N = handle slanted, with metric thread.

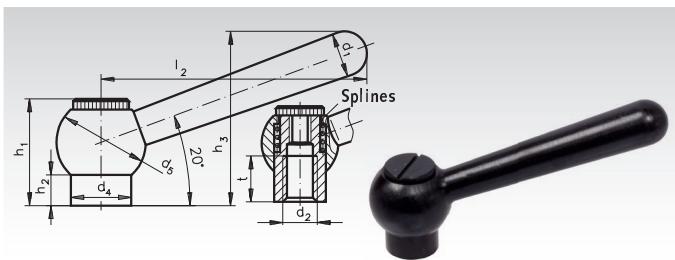

Use: In applications where either the clamping range is limited or where a specific lever position is required. The serrated bore in the spherical hub is fitted with a threaded-bolt insert, which engages in the hub with its own serrations.

By depressing the clamping lever, the serrations are disengaged, freeing it for re-positioning in the most convenient position.

When releasing the lever, the serrations re-engage automatically. Should a rotation of 360° not be possible, the insert can be slightly screwed in (after the lever has been disengaged) by means of the slotted knurled screw.

Ordering Details: e.g.: Product No. 665 508 00, Adjustable Clamping Lever 119 St, 10 mm

Cabinet "U" Handles 525

Material: Plastic Duroplast PF31, black glossy finish, flash mark thoroughly polished.

A special feature is that the flash mark on this handle is not visible nor can it be felt. The large tube diameter and the brass threaded bush lead to an immense rigidity.

Temperature resistant up to 110°C.

Ordering Details: e.g.: Product No. 666 601 00, Cabinet "U" Handle 525, 86 mm

Product No.	Length l mm	a mm	b mm	d mm	h mm	t mm	Weight g

Cabinet "U" Handles 425 from Steel or Stainless Steel

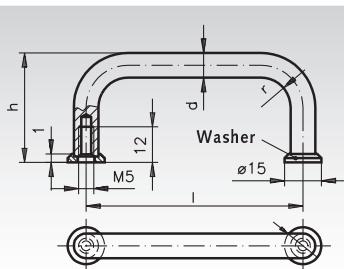

Material: Version CR: Steel, chrome plated.

Washers zinc die-cast, nickel plated.

Version NI: Stainless steel 1.4305, blasted, matt finish. Washers stainless steel 1.4305.

Supplied with two washers. These discs guarantee perfect positioning even with large bores in the cabinet. The washers are loosely packed.

Ordering Details: e.g.: Product No. 666 612 00, Cabinet "U" Handle 425, CR, 88 mm

Folding Handles Made from Steel or Stainless Steel

Material: Version CR: Steel, chrome plated.

Version NI: 1.4305, blasted, matt finish.

Mainly used in applications where the handle should not stick out, or where sticking out should be kept to a minimum. The handle is locked in both end positions by a spring-loaded pressure pin. Hexagon nuts and washers are included in the delivery.

Ordering Details: e.g.: Product No. 666 680 00, Folding Handle, Steel, Chrome Plated

Folding Handle with Recessed Tray 425.4

Material:

Folding handle made from steel, chrome plated. Tray: Zinc die-cast, plastic coated, black.

Used in applications where the folded handle must not stick out, or where the sticking out must be max. 3 mm. In addition, screws M4 are sufficient for mounting the handle on the housing. Handle and folding mechanism are made from chrome-plated steel and the tray is made from zinc die-cast. This gives the folding handle additional strength (supplied as complete assembly).

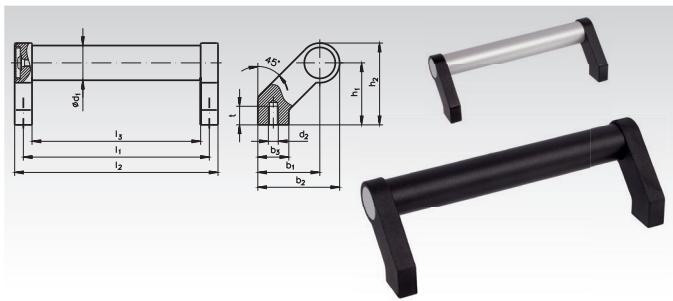

Ordering Details: e.g.: Product No. 666 550 00, Folding Handle with Recessed Tray
